A helping hand for new Beginnings

* Nepal-US AI Hackathon 2025 *

CloudMonk

PROBLEMS

Information Gap

Lack of access to reliable, localized information about rights, laws, and essential services.

Accessibility

Difficulty navigating complex legal and bureaucratic systems in a new language and culture.

Isolation

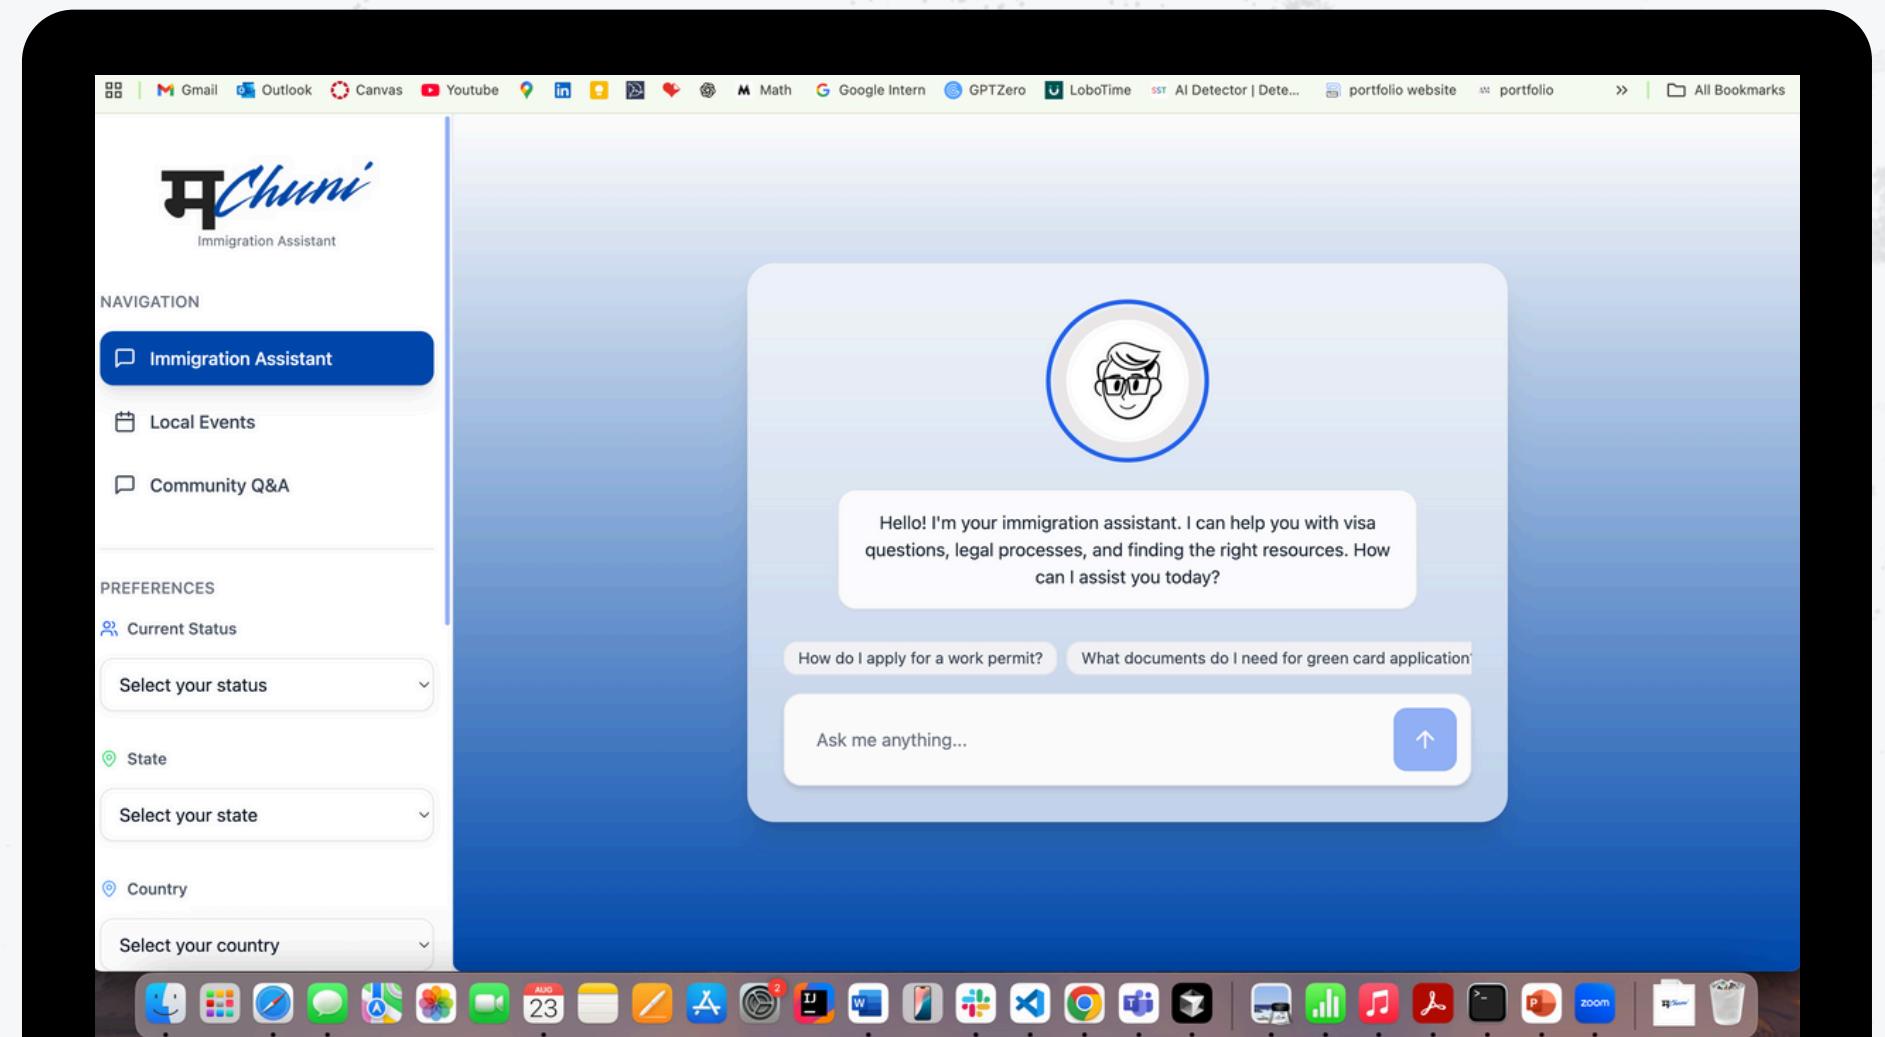

Lack of community support and resources for cultural assimilation and mental well-being.

CloudMonk

अचुनि

An AI-powered platform designed to inform, protect, and empower the Nepali community abroad. We provide a centralized, user-friendly "AI safety net" for navigating the complexities of immigration.

CloudMonk

SOLUTIONS

Our platform will offer:

Instant, reliable answers

A multilingual chatbot for legal, cultural, and practical questions.

Information Accuracy

Our system prioritizes accuracy. If a query falls outside the AI's high-confidence range, it will be forwarded to a relevant forums and verified human expert ensuring reliable information

Community and Culture

Connect with people, discover local spots, and explore ways to assimilate smoothly into U.S. culture.

Personalized support

Recommendations for essential services based on user location and needs.
